

# The Planets

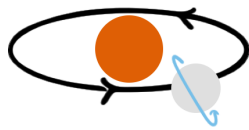

Can you match the fact to the planet?

I have the most (64!) moons

A giant storm called the “Great Red Spot” lives on me

I’m the only planet known to have life

I’m tilted over in my orbit

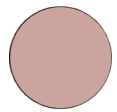

I have the longest days in the Solar System! (243 Earth days!)

I have the biggest mountain in The Solar System (Olympus Mons)

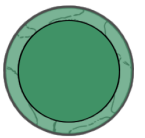

My existence was predicted by maths, before I was seen through a telescope!

I’m the smallest and closest to the Sun

Mercury

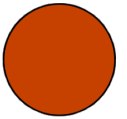

Venus

Earth

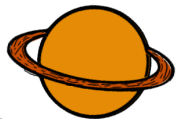

Mars

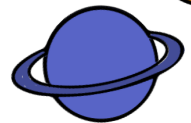

Jupiter

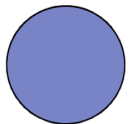

Saturn

Uranus

Neptune
